Note: For Bi.P.C Students to choose Remedial Mathematics (Theory).
For M.P.C Students to choose Remedial Biology (Theory: 2-1-0-2, Lab: 0-0-3-2)

*Mandatory Course
REMEDIAL MATHEMATICS

B.Pharm. I Year I Sem.  
Course Code: BS101  

L  T/P/D  C  
4  1/0/0  4

Course Objectives: This is an introductory course in mathematics, the subject deals with introduction to algebra, trigonometry, differential calculus, integral calculus etc.

Course Outcome: The student will learn the basics of mathematics which will be helpful in pharmaceutical calculation in the higher classes

UNIT I

Algebra: Permutations and combinations - Binomial theorem - Partial fractions (addition, subtraction and multiplication) - Matrices - Determinants - Application of determinants to solve simultaneous equations (Cramer’s Rule).

UNIT II

Trigonometry: measurement of angles, trigonometry functions, compound angles, trigonometry ratios of multiple angles (sin 2θ, cos 2θ, tan 2θ), Heights and distances (All simple problems only).

Co-ordinate Geometry: Distances between two points, Area of a triangle, division of line segment, locus.

UNIT III

Differential Calculus: Continuity and limit: Differentiation, derivative of product, derivative of function, derivation of a fraction of functions

Derivatives of trigonometric functions (excluding inverse trigonometric and hyperbolic functions).

Derivatives of Logarithmic and exponential functional, partial dedifferentiation, maxima and minima (all simple problems)

UNIT IV

Integral Calculus: integration of algebraic and exponential functions, Integration of trigonometric functions, integration by parts, integration by the method of substitution, definite integrals, areas and curves (all simple problems)

UNIT V

Differential Equations: Formation of a differential equation, equation of 1st order and 1st degree, Homogenous, exact differential equation

Text Books

1) Intermediate first Year mathematics and Intermediate Second year mathematics, printed and published by Telugu Academy, Himayath nagar, Hyderabad
2) Remedial Mathematics by Shahnaz Bathul

REMEDIAL BIOLOGY - I

B.Pharm. I Year I Sem.  
Course Code: BS102

Course Objectives: This is an introductory course in biology which gives detailed study on natural sources such as plant and animal origin. This subject deals with the plant cell, animal cell classifications plant kingdom and study of animal issues and study about frogs and some animals.

Course Outcome: The student will learn details about plant and animal cells plant taxonomy classification and some aspects of physiology of frogs and animals.

UNIT I

UNIT II
Morphology and histology of root, stem, bark, wood, leaf, flower, fruit and seed. Modifications of root and stem.

UNIT III
Taxonomy: Systemic position and classification of following families: umbelliferae, apocyanaceae and liliaceae.

UNIT IV
Animal cells and tissues: ultra structure of animal cell, cell division, types of cells and tissues and their functions
Study of anatomy of frog: Basic study of digestive system, CVS, nervous system, genito-urinary system, musculoskeletal system.

UNIT V
Structure and life history of parasites illustrated by Amoeba, Entamoeba, Trypanosome, Plasmodium, Taenia, Ascaris,

Suggested Text Books
1) Intermediate First Year and Second Year Botany / Zoology Text Books printed and published by Telugu Academy, Himayath nagar and Hyderbad.
2) A.C. Dutta, Text Book of Botany
3) Botany for Degree students Vol I and II by B. P. Pandey
4) Engel- Concepts biology
DISPENSING AND GENERAL PHARMACY

B.Pharm. I Year I Sem.  
Course Code: PS103  
L T/P/D C  
4 1/0/0 4

Course Objectives: The student shall be given orientations to know the origin of pharmacopoeias on dispensing procedure of medicines, pharmaceutical calculation, and interpretations of incompatibilities.

Course Outcome: Student will be familiar with the Hospital pharmacy organization, drug distribution procedures, dispensing, storage, incompatibilities and patient related factors.

UNIT I
a. Genesis and Evolution of Pharmacy: History of Pharmacy, origin and development of the Pharmacopoeias, History of Ayurveda, salient features of IP, USP and BP.  
Pharmacy Education – D. Pharm, B Pharm, M.Phrarm, Pharma-D, Qualification for getting license.

b. Dispensing Pharmacy: Principles of dispensing, form of prescription, handling of prescription, source of errors in prescription, care required in dispensing procedures including labelling of dispensed products.

UNIT II
Calculations:  
Weights and Measures, introduction to Latin terms, Percentage calculations, alligation method, proof spirit calculations, displacement value and calculations of isotonicity adjustment. General dispensing procedure- posology-calculations of doses.

UNIT III
Principles involved and procedures adopted in dispensing of the following classes of preparations.  
(i) Mixtures (ii) Solutions (iii) Emulsions (iv) Powders  
(v) Lotions and liniments (vi) Ointments (vii) Suspensions (viii) Syrups  
(ix) Suppositories.

Definition of the following preparations like creams, capsules, pastes, jellies, suppositories, ophthalmics, lozenges, pills, inhalations, paints, sprays and tablet triturates.

UNIT IV
Pharmaceutical ethics  
Introduction to Pharmaceutical ethics, ethical guidelines for retail pharmacist / community Pharmacist, manufacturing Pharmacist and pharmaceutical researcher

UNIT V
a. Fundamental operations: Weighing, measurement of liquids, procedure of dispensing solution.
b. Colours: Reasons for colouring pharmaceutical preparations, colouring of tablets, capsules and non-injectable fluids, Desirable properties of colouring agent, different types of colouring agents.

c. Excipients: Types of flavouring agents, preservatives and stabilisers

Text Books
1) Cooper and Gunns Dispensing Pharmacy, CBS, Publ. and Distributors New Delhi.
2) R.M Metha, Dispensing Pharmacy.
3) JS Quadry, Hospital Pharmacy.

References
1) Lippincott Williams and Wilkins, Remington Pharmaceutical Sciences.
2) William Hassan, Hospital Pharmacy.
ANATOMY PHYSIOLOGY AND HEALTH EDUCATION - I

B.Pharm. I Year I Sem. 
Course Code: PS104

Course Objectives: This course is designed to impart a fundamental knowledge on the structure and functions of the human body. The overall anatomy and physiology of organ systems and their coordination are being dealt.

Course Outcome: Describes the structure and functions of various organs of the human body and mechanisms in the maintenance of normal functioning and disease state are known.

UNIT I
Scope of Anatomy and Physiology and basic terminology used in these subjects. Structure of cell, its components and their function. Elementary tissues of the human body: epithelial, connective, muscular and nervous tissues, their sub-types and characteristics. Body fluids, Homeostasis.
Skeletal system: Structure, composition and functions of skeleton, classification of joints, types of movements at joints.
Skeletal muscles: Gross anatomy, physiology of muscle contraction, physiological properties of skeletal muscles and their disorders. Rheumatoid arthritis, Gout.

UNIT II
Haemopoietic system and Lymphatic System: Composition and functions of blood and its elements, their disorders, blood groups and their significance, mechanism of coagulation, Anemias and its types, lymph organs.

UNIT III

UNIT IV
Digestive System: Gross anatomy of the gastro-intestinal tract, functions of its different parts, various gastrointestinal secretions and their role in the absorption and digestion of food, peptis ulcer, ulcerative colitis, hepatic disorder.

UNIT V
Demography and Family Planning: population problem, family planning and various contraceptive methods. Medical termination of pregnancy.
Brief outline of communicable diseases, causative agents, modes of transmission and prevention (chicken pox, influenza, diphtheria, whooping cough, tuberculosis, poliomyelitis, hepatitis, cholera, typhoid, malaria, rabies, tetanus, leprosy, syphilis and Aids).
Text Books
2) Ross and Willson, Text Book of Human Anatomy, M.J.Mycek S.B Gerther and MMPER
3) Human Anatomy and Physiology with health education by Padma B Sanghani

PHARMACEUTICAL ORGANIC CHEMISTRY - I

B.Pharm. I Year I Sem. Course Code: BS105

L T/P/D C 4 1/0/0 4

Course Objectives: The organic compounds are classified based on their functional groups and character. The basic principles and mechanisms of different types of organic reactions are explained in an elaborate manner.

Course Outcome: The detailed study on the mechanisms involved in various reactions would help the students to understand the synthesis of higher organic compounds which would be dealt in future classes.

UNIT I
   b. Aliphatic/Alicyclic Hydrocarbons: Nomenclature, isomerism (chain, conformational and geometrical) relative stabilities (heats of combustion and hydrogenation), ring stabilities of cyclohexane, chair-boat conformation, Bayer’s strain theory and Sachtse-Mohr theory. Free radical substitution reactions (halogenation) of alkanes.

UNIT II
a. Alkenes: Electrophilic addition reactions of alkenes, Markovnikov’s rule, Kharasch effect, Bayer’s oxidation (cis-hydroxylation, polymerisation).
   b. Alkadienes: Stability and 1,4 addition reactions of conjugated alkadienes.

UNIT III
Aromatic Hydrocarbons: Kekule’s structure of benzene, bond lengths, heats of hydrogenation and stability, molecular orbital picture of benzene, aromaticity, Huckel’s rule, nomenclature of benzene derivatives, characteristic reactions of benzene, theory of reactivity and orientation in mono substituted benzenes.

UNIT IV
a. Halogen Compounds-Aromatic: Nomenclature, low reactivity of halo benzenes towards nucleophilic substitution, arenes.
   b. Halogen Compounds-Aliphatic: Nomenclature, general methods of preparation, characteristic nucleophilic substitution reactions, factors that play role in SN1 and SN2, Walden inversion, elimination reaction and Saytzeff’s rule.

UNIT V
Alcohols: Nomenclature, classification, general methods of preparation, physical properties, hydrogen bonding, characteristic nucleophilic substitution reactions (replacement of -OH by -
Cl), elimination reactions, and relative reactivities of 1°, 2° and 3° alcohols, Meerwein Pondorff Verley reduction.

Text Books
3) Ball and Ball Advanced pharmaceutical organic chemistry.

PROFESSIONAL COMMUNICATION IN ENGLISH

B.Pharm. I Year I Sem.
Course Code: HS106

WILL BE UPLOADED TOMORROW
DISPENSING AND GENERAL PHARMACY LAB

B.Pharm. I Year I Sem.  
Course Code: PS107

1) Dispensing of prescriptions falling under the categories; Mixtures, solutions, emulsions, creams, ointments, powders, pastes, lotions, liniments, inhalations, paints, syrups, Suppositories etc.

2) Dispensing procedures involving pharmaceutical calculations, pricing of prescriptions and dosage calculations for paediatric and geriatric patients.

3) Dispensing of prescriptions involving adjustment of tonicity.

4) Categorization and storage of pharmaceutical products based on legal requirements of labelling and storage.

5) Project report on visit to the community pharmacy for Counseling on the rational use of drugs and aspects of health care.

ANATOMY, PHYSIOLOGY AND HEALTH EDUCATION - I LAB

B.Pharm. I Year I Sem.  
Course Code: PS108  
L  T/P/D  C  0  0/3/0  2  
(21 Experiments)

1. Study of human skeleton
2. Study of different systems with the help of charts and models
3. Microscopic study of different tissues
7. Estimation of D.L.C.
8. Recording of body temperature, pulse rate and blood pressure, basic understanding of Electrocardiogram-PQRST waves and their significance
9. Determination of vital capacity, experiments on spirometry
10. Study of reproductive system with the help of charts and models
11. Various devices used in Family planning like Copper T, Lippers loop, Pills, Diaphragm and Condom.
12. Microscopic studies of abnormal tissue sections
13. Simple experiments involved in the analysis of normal and abnormal urine; collection of specimen, appearance, determination of pH, sugars, proteins, urea and creatinine
14. Study of special senses with the help of charts and models

PHARMACEUTICAL ORGANIC CHEMISTRY-I LAB

B.Pharm. I Year I Sem. Course Code: BS109

L T/P/D C 0 0/3/0 2

I. Introduction to Equipment and Glassware
1. Determination of melting point/boiling point by Thiels method.
2. Determination of Mixed melting point for organic compounds.
3. Recrystalization (Purification including decolourization) of two organic compounds.

II. Preparation of organic compounds (each involving a specific organic reaction covered in theory)
1. N-Acetylation : Preparation of Acetanilide from Aniline
2. O-Acetylation : Preparation of Aspirin from Salicylic acid
3. Nuclear Bromination : Preparation of p-Bromoacetanilide from Acetanilide
4. Hydrolysis : Preparation of p-Bromoaniline from p-Bromoacetanilide
5. Nuclear Nitration : Preparation of m-Dinitrobenzene from nitrobenzene
6. Oxidation : Preparation of Benzoic acid from Benzyl chloride
7. Esterification : Preparation of n-Butylacetate from n-Butylalcohol
8. Etherification : Preparation of β-Naphthyl methyl ether from β-Naphthol
9. α-Halogenation : Preparation of Iodoform from Oxidation of Acetone
10. Extensive Nuclear Substitution : Preparation of Tribromophenol or Bromination

III. Systematic qualitative Analysis (Identification) of Monofunctional Organic Compounds:
Avoid water-soluble compounds, and compounds containing more than one functional group; at least six individual compounds to be analyzed.

REMEDIAL BIOLOGY LAB

B.Pharm. I Year I Sem.
Course Code: BS110

1) Introduction to simple and compound microscope and their handling
2) Morphological study of various plant parts
3) Study of histology of monocot root, stem, leaf and dicot root, stem and leaf
4) Systemic study of representatives of following families: apocyanaceae, solanaceae, three sub families of leguminaceae and liliaceae
5) Demonstration of various systems of frog
6) Study of structure of human parasites and insects mentioned in theory with the help of specimen.
7) Microscopic examination of specimens slides related to plant and animal tissues.
